### New Referred Client Announcement

With thousands of companies utilizing ViewTech VJ-3 video borescopes, it is a common occurrence that inspectors share tips and their tools of the trade with each other. Many of the times these tools are the suppliers and manufacturers who provide a quality product and superior customer service.

As two of ViewTech Borescopes newest clients discovered, all visual inspection equipment is not created equal. While searching for a better borescope and supplier for their applications inspection needs, a company specializing in ultra-high purity, industrial orbital welding projects and an open pit mining operation contacted ViewTech Borescopes to take their inspection equipment to the next level. ### IR Forehead Thermometers

Our manufacturer has provided us with a large amount of IR forehead thermometers and we would like to help you out during this pandemic. Please

reply to this email with your shipping address if you would like us to send you one of our thermometers.

## INDUSTRY NEWS

### Why Pre-Build Calibration is Critical to Part Quality for Metal Additive Manufacturing

Conversations around quality in metal additive manufacturing often focus on the flashy application of high-frequency, in situ, real-time monitoring systems and the neural networks or machine learning required for map-reduction of the mountains of data generated. There is, however, an often-overlooked aspect of consistently making high-quality parts: calibrations.

### 10 Women in Aviation You Should Know

The achievements and progress made by women throughout history shouldn't just be relegated to Women's History Month. While there is still so much room for female inclusion in the aviation industry, there have been some incredible women who have stood out across decades with their accomplishments in the field.

## Chevy's Silverado Electric Truck to Share Assembly Line with Hummer EVs

General Motors announced it will build an electric Chevrolet Silverado full-size pickup truck in Detroit. The new Silverado is designed from the ground up to be an electric vehicle, GM President Mark Reuss said at an event at the Detroit-Hamtramck plant that has been renamed Factory Zero because it is being retooled to only build electric vehicles.
