VJ-4 1.1mm Flexible Borescope

ViewTech's newest and smallest video borescope, the VJ-4 1.1mm, is non-articulating and flexible. Featuring an IP67-rated stainless steel insertion tube, the VJ-4 1.1mm is available with a 1-meter length. By capturing high quality images and videos while inspecting a variety of tools, parts, and sub-assemblies, the VJ-4 video borescope can avoid costly and time-consuming disassembly or dismantling.

The flexible VJ-4 1.1mm insertion tube in comparison to a dime and push pin.

Several of the newest 1.1mm borescope users include both metal & silicone casting, medical device manufacturing, aerospace & aviation manufacturing. If your toolbox lacks a borescope smaller than 2mm, with an insertion tube diameter of only .044", the [VJ-4 1.1mm video borescope](#) is the best option. Contact a ViewTech borescope expert to trial a VJ-4 at your own facility with our no-cost demo program.
