Renewable Energy Preventative Maintenance and Visual Inspections Successful with Video Borescopes

As the clean energy revolution continues a path of rapid growth, R&D, along with manufacturing of new green technologies, requires thorough nondestructive testing. With many prototypes and advancements of current components adhering to clean energy standards, ViewTech Borescopes has witness an expansion of clients that use a ViewTech VJ-3 video borescope for inspecting a variety of clean energy options including wind turbines, solar, hydro, nuclear, EVs, and electric recreational vehicles.

INDUSTRY NEWS

[United Becomes the 1st Major U.S. Airline to Require Employees to be Vaccinated](#)

United Airlines has told its 67,000 U.S.-based employees that they will need to inoculated against COVID-19 by late October to stay on the job. Citing "incredibly compelling" evidence that the vaccines are safe and effective, United CEO Scott Kirby announced the policy change on Friday.

Utah's Oil and Gas Industry is as Busy Now as it was During Trump's 'Energy Dominance' Era

There were just three rigs drilling in Utah's oil and gas fields last January when newly installed President Joe Biden halted new leasing on public lands while his administration reviewed the federal oil and gas program. As of August 4, there are 10 rigs sinking new wells in the Uinta Basin, according to energy consultant Baker Hughes.

Beyond the Chip Shortage: Automotive Industry Should Prepare as Scarcity of Minerals Looms for Electric Vehicle Batteries

The automotive industry is currently under regulatory pressure to reduce CO2 emissions per mile, sparking a massive manufacturing transition to electric vehicles (EVs). The EV passenger car market is expected to have robust growth globally in the coming decade. However, just as supply chains are morphing to accommodate this transition, a potential shortage of minerals used in EV batteries is also appearing on the horizon.

Manufacturing Adds 27,000 Jobs,

Paced by Durable Goods

Manufacturing boosted employment by 27,000 jobs in July, with durable goods doing the heavy lifting. Durable goods accounted for 20,000 jobs of last month's gain, according to a breakdown by industry issued by the U.S. Bureau of Labor Statistics.
