

Borescope News

New ViewTech small diameter borescopes are now available!

Introducing the **VJ-3 1.7mm** and **VJ-4 1.1mm** video borescopes. Easily conduct visual inspections in the most confined spaces and intricate machinery.

These small diameter video borescopes allow visual access to previously unattainable areas, saving you from considerable downtime.

These newest additions are designed for inspection applications across diverse industries, including aerospace, automotive, manufacturing and more.

The **VJ-3 1.7mm** features 2-way articulation, while the non-articulating **VJ-4 1.1mm** has a flexible insertion tube. Despite their compact design, the 1.7mm and 1.1mm deliver high-resolution imaging, ensuring clear and detailed inspection videos and photos.

Contact ViewTech's video borescope experts to trial the VJ-3 1.7mm or VJ-4 1.1mm today!

Industry News

[United Launch Alliance Launches First Vulcan Rocket](#)

United Launch Alliance (ULA) marked the beginning of a new era of space capabilities with the successful launch of its next generation Vulcan rocket on Jan. 8, 2024 at 2:18 a.m. EST from Space Launch Complex-41 at Cape Canaveral Space Force Station. The Vulcan rocket replaces ULA's Atlas V booster for many missions.

[New Fuel Cell Harvests Energy From Microbes In Soil To Power Sensors, Communications](#)

A Northwestern University-led team of researchers has developed a new fuel cell that harvests energy from microbes living in dirt. About the size of a standard paperback book, the completely soil-powered technology could fuel underground sensors used in precision agriculture and green infrastructure.

[NASA and Lockheed Martin Roll Out X-59 Quiet Supersonic Aircraft](#)

NASA and Lockheed Martin have introduced the X-59, a supersonic aircraft designed to break the sound barrier without causing the typical loud sonic boom. The 30-meter-long, 10-meter-wingspan aircraft was officially presented at Lockheed Martin's legendary Skunk Works site in Palmdale, California. The X-59 will be capable of reaching speeds of 1.4 times the speed of sound, approximately 1,500 kilometers per hour.

[Vestas Introduces ArcelorMittal's Low Carbon-Emissions Steel Offering For Wind Turbines](#)

Vestas, the energy industry's global partner on sustainable energy solutions, has established a partnership with ArcelorMittal to launch a low carbon-emissions steel offering that significantly reduces the lifetime carbon dioxide emissions from the production of wind turbine towers.
