BORESCOPE NEWS

{First Name},

Business continued for North America's top seller of video borescopes to close out the second quarter of 2020. Despite COVID-19 shutdowns impacting many industries, ViewTech's borescopes improve the quality and productivity of technicians during a vast array of application inspections, many of which have been deemed essential during the coronavirus pandemic. In addition to increasing their client base, ViewTech Borescopes also launched its newest and smallest diameter video borescope with the VJ-3 2.2mm. As inspection areas decrease in size, ViewTech Borescopes insertion tube diameters are following suit. [Read More](#)

INDUSTRY NEWS

Using Drones to Mitigate Pollution Losses

The oil and gas industry is increasingly utilizing drones particularly for remote monitoring, inspection and predictive maintenance of critical infrastructure. More recently, there has been a rise in the use of drones in oil spill incident response. This article considers how this particular usage

can mitigate pollution losses for oil companies and their insurers.

Competent, Qualified and Certified

Nondestructive testing (NDT) is an extremely critical step in many industries. The safety of individual parts, entire systems, and even people can be directly tied to NDT. A single missed defect in an airline or spacecraft could cost millions of dollars and most importantly result in the loss of human life. For these reasons we need to ensure that NDT personnel are competent, qualified, and certified.

North American Aerospace Industries' Managing Principal/General Manager Urges Aviation Industry to Adopt Best Practices for Sustainability

North American Aerospace Industries Corporation (NAAI)'s managing principal/general manager, Sven Daniel Koechler, PhD, believes the aviation industry can do more to promote sustainability. "We are about to break ground on our planned aircraft recycling facilities in the GlobalTrans Park in Kinston, NC," Koechler says.
