## ViewTech Launches the 3D Measurement VJ-4 Taking the Guesswork Out of Critical Inspections

Designed to enhance inspection accuracy and efficiency, RVI professionals can now accurately measure defects without ever taking the machinery apart. Thus enabling more informed maintenance decisions across a range of applications. The **3D Measurement VJ-4** is available in **6.0mm, 3.9mm, Front-View, and Side-View** configurations.

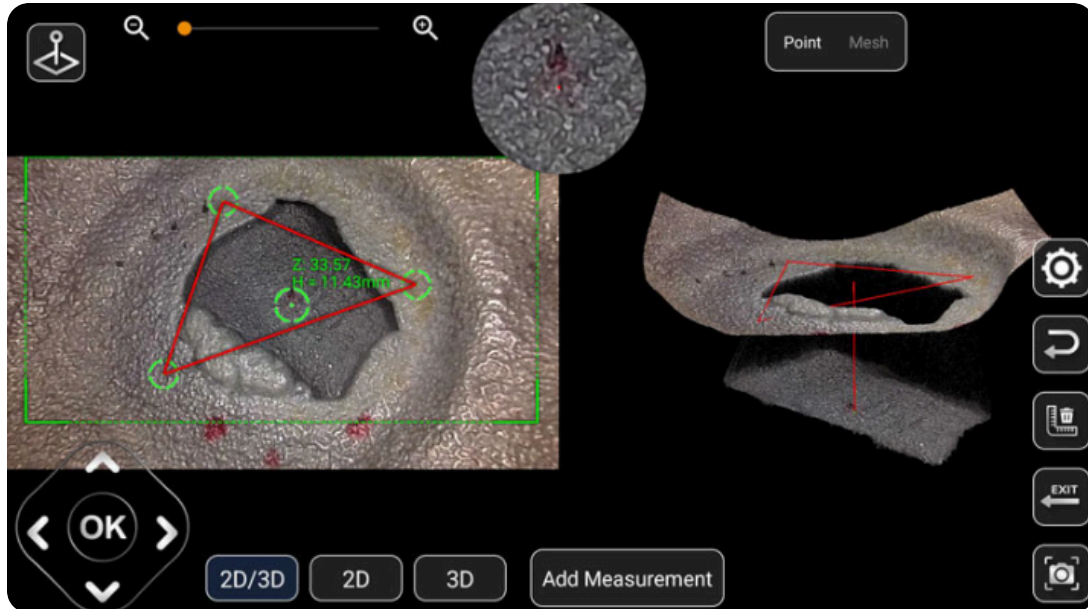

## 3D Measurement Provides Instant Answers at the Flight Line

For aviation field service representatives, reducing aircraft downtime is critical. After their **free on-site demo** an aerospace FSR highlights how the **ViewTech 3D Measurement VJ-4** borescope transforms

engine inspections into an efficient operation.

- **Instant Precise Measurement:** Instantly identify if component damage is within acceptable limits.
- **Unmatched Clarity:** Side-by-side 2D and 3D views provide a complete 360° vantage point.
- **Reduced Downtime:** Drastically reduces the time aircraft are in a non-mission capable status.

As the reviewer noted, "*The depth measurement in my opinion is the absolute selling point of the 3D Measurement VJ-4. Having the ability for a mechanic to instantly identify if damage is out or within limits in seconds is a game changer.*" [Request More Information](#)

## From "Looks Bad" to "Here's the Data": The Case for 3D Measurement

You've seen corrosion that concerned you, cracks you weren't sure about, wear patterns that didn't look right. But you're left asking: How bad is bad? The 3D Measurement VJ-4 Borescope replaces subjective interpretation with real numbers, in real time.

### Example Use Cases:

- Corrosion pit depth in a heat exchanger tube
- Coating loss area on a power generation component
- Weld crown deviation on a fabricated assembly

### The Result:

- Faster, more defensible maintenance decisions
- Data trackable across inspection cycles
- Data engineering teams can act on immediately

## Feature of the Month: Fast Folder Select Keep 3D Images Organized, Faster

Say goodbye to sorting through inspection files at the end of the day! The **VJ-4 Fast Folder Select** keeps you organized on the fly with its intuitive folder management system.

Easily create, duplicate, or delete custom folders directly from the touchscreen.

Select your desired "active" folder before you start your inspection — all your media saves exactly where it belongs!

**Quick Tip:** You can also use your computer to create the folder structure by connecting the borescope via FTP or putting the SD card in the computer.
