

Borescope News

When a ViewTech client discovered a snake coiled inside the frame of their vehicle, a VJ-4 video borescope was the perfect tool for slithering into the tight space and to determine the type of snake they were dealing with! Thanks to the VJ-4 video borescopes crystal-clear image, it was quickly identified as a rat snake (and measured around 6.5' long).

If you have a unique inspection image or video you would like to share, email the details to info@viewtech.com.

See You At Space Tech Expo

Meet ViewTech Borescopes in-person at [Space Tech Expo USA](#) at booth #449. Join Zack Wessels and thousands of other space manufacturing and technology professionals, June 3 – 4, at the Long Beach Convention Center in Long Beach, CA. Learn more and [register for free](#) with code INVITE25.

Toyota Scores Manufacturing, Operational Privileges For Joby's Air Taxi

Toyota Motor Corp. is doubling down on its commitment to electric vertical takeoff and landing (eVTOL) air taxis. Per an SEC filing, the automaker last week finalized a \$250 million investment in air taxi developer Joby Aviation—the first of two equal tranches totaling \$500 million, announced in October.

3D-Printed Metal Molds Poised To Accelerate US Auto Manufacturing

Recent advancements at the U.S. Department of Energy's Oak Ridge National Laboratory show that 3D-printed metal molds offer a faster, more cost-effective and flexible approach to producing large composite components for mass-produced vehicles than traditional tooling methods.
