Aviation Maintenance Training Center Adds VJ-4 Video Borescope to Their Toolbox

In an investment for its aviation program, a community college in Colorado recently purchased a ViewTech VJ-4 6.0mm x 1.5m video borescope.

The VJ-4 6.0mm will enhance the program's hands-on training capabilities, allowing students to conduct aircraft piston engine and other detailed inspections. By integrating the VJ-4's state-of-the-art capabilities into their curriculum, the college aims to better prepare students for careers in aviation maintenance, ensuring they are equipped with the skills and knowledge needed in a rapidly evolving industry. The addition of a VJ-4 borescope not only strengthens the college's offerings but also reflects its commitment to providing high-quality education and training to aspiring aviation professionals.
