BORESCOPE NEWS

{First Name},

As video borescopes are increasingly used as a visual inspection tool, ViewTech Boreoscopes VJ-3 video borescope is reputedly one of the most desired tools to own. From family-owned businesses to Fortune 500 corporations, each day thousands of users rely on their VJ-3 to improve maintenance, inspection and repair processes. During August business, two of ViewTech's newest clients acquired include a corrosion management company and an equine veterinary practice. [Read More](#)

INDUSTRY NEWS

FAA Giving Grants to Support Aviation Maintenance Careers

The Federal Aviation Administration (FAA) has announced the Aviation Maintenance Technical Workforce Development Grant Program to increase interest and recruit students for careers in aviation maintenance. The goal is to provide grants to academia and the aviation community to help prepare a more inclusive talent pool of aviation maintenance technicians, to inspire and recruit the next generation of aviation professionals.

Mitsubishi Power Helps Diversify and Decarbonize the Illinois Power Grid: Ships the First JAC Gas Turbine Manufactured in America to J-POWER USA's Jackson Generation Project

Mitsubishi Power shipped the first JAC gas turbine manufactured in America to J-POWER USA Development Co. Ltd. for its 1,200 megawatt Jackson Generation project in Elwood, Illinois. This project supports the state's commitment to renewable energy by providing efficient, flexible generation that complements additional wind and solar energy and reduces Illinois' dependence on coal-fired generation.

Machine Vision Frame-by-Frame

Frame grabbers are essential components in machine vision systems that provide ultra high-speed, high-data image capture from one camera or multiple cameras simultaneously. A new generation of frame grabbers is now capable of bringing together images and transferring the data with minimal or no latency to PCs for analysis, helping manufacturers meet zero defect inspection goals with greater precision, and still reduce the overall time and cost of inspection.

IBM and Red Hat to Build Oil and Gas Industry Hybrid Cloud

Schlumberger, IBM and Red Hat have joined forces to accelerate digital transformation across the oil and gas industry. The collaboration will initially focus on private, hybrid and multi-cloud deployments for Schlumberger's own services with Red Hat OpenShift. This will then hopefully lead to the delivery of the first hybrid cloud implementation for the OSDU - an open data standard for the oil and gas industry.
